

# Introducing Stay: The Family App Blocker

Stay is a revolutionary app designed to protect family time from automatic scrolling. By scheduling app blocking and allowing personalized photo prompts, Stay empowers parents to regain control over their children's screen time.

## Key Features

- **Scheduled App Blocking:** Parents can choose specific moments to block distracting apps, ensuring uninterrupted family time.
- **Personalized Photo Prompts:** Stay uses family photos to gently pause scrolling, encouraging intentional engagement with loved ones.
- **Allowlist Functionality:** Parents can keep needed apps available with a simple allowlist, balancing screen time and productivity.
- **No Personal Data Collection:** Stay prioritizes privacy by keeping photos and protected moments local and avoiding personal data collection.

## Availability

Stay is available for download on iOS. It is free to use with optional monthly subscriptions starting at \$4.99 or a yearly subscription for \$49.99.

Download on the App Store: <https://apps.apple.com/app/id6754261661>

## About the Developer

My name is Mark and I run a solo software studio in my spare time. I build a few things with obsessive care — software that respects your attention instead of competing for it, made the slow, old-fashioned way: one detail at a time, until it's right.
